

fashionable since  
the 15th century

Pathway width = 1.2m

## Cobblestone Straights

Layout 1

Layout 2

### NOTES:

1. 1.2 m is a common width of walkways between a house and fence line and is exactly the length of a single sheet of cobblestone straights.
2. With Non Vehicle areas such as pathways you do not need to interlock the cobble sheets (i.e. cut every 2<sup>nd</sup> cobble from the end of each sheet)
